

SAFE POWER MORCELLATION SYSTEM

ENDORSED BY LEADERS WORLDWIDE

A PARADIGM CHANGING
SYSTEM FOR SAFE
TISSUE MORCELLATION

SAFE POWER MORCELLATION

Now a Reality...

In Bag Laparoscopic Morcellation- A surgical advancement with major benefits

It is well known and accepted that the ability for medical community to perform laparoscopic surgery offers tremendous benefits to the patient. In cases where hysterectomy or myomectomy is indicated, laparoscopy surgery has many benefits over traditional laparotomy such as:

- No large abdominal Incision
- Lower Risk of Surgical Site Infection
- Lower Postoperative Readmission Rate
- Less Postoperative Pain
- Less Intraoperative Bleeding
- Less Adhesion Formation
- Faster Healing and Recovery
- Reduced Hospital Stay

Tissue Morcellation, performed in combination with an isolated containment bag, has been proven to be an important advancement in Laparoscopic Surgery

Versator[®]+ Morsafe[®] = A Winning Combination to make Women's Health Safer!

SAFE TISSUE MORCELLATION SYSTEM

The New Versator tissue morcellation system consists of VDU, Handpiece, Rotos and Tissue Morcellation Bag. It is a unique reusable product, offering the ability to morcellate using a light weight, powerful disposable handpiece while being able to reuse the rotor upto 10 times.

The New Morsafe tissue morcellation bag has been designed and is specifically indicated for morcellation and as a result offers significant features and benefits that cannot be duplicated by other non-indicated bags being considered. Using MorSafe, you can now successfully prevent the dissemination of morcellated tissue around the peritoneal cavity.

Morcellate Safely...

FEATURES AND BENEFITS OF THE VERSATOR MORCELLATION SYSTEM

HANDPIECE (New Design with More Power)

The Versator Tissue Morcellation System is a reusable design which has a disposable Handpiece, a reusable Rotor and a DBU (Versator Drive Unit). This versatile combination offers benefit of both Cost Effectiveness and Performance. The handpiece comes in a sterile blister back with its accessories such as an expandable plastic obturator and two sizes of reducers.

CUT Mode

CUT PLUS Mode

Dual Cutting Modes

Rotatable Core Guard

Performance and Usability Features

POWERFUL

High torque motor to cut all types of tissue

FASTEST

With a maximum speed of 1600 rpm tissue cutting is fast

SHARPEST

Razor Sharp blade to cut through the TOUGHEST of tissue

LIGHT WEIGHT

World's LIGHTEST Handpiece in its segment making it surgeon friendly

ERGONOMIC DESIGN

Unique design helps in reducing fatigue & improves control

Sterile Disposable Ready to use kit (Handpiece + Bag) Benefits:

Ensures Patient Safety

Better Patient Scheduling

Cost Effective Solutions

VERSATOR UNIT & ROTOR

- Eight Step Speed Control
- User Friendly Touch Screen Interface
- Rotor reusable for upto 10 times

Why in Bag Morcellation is a Requirement?

Reduces the risk of dissemination of cells

Eliminates the requirement of Peritoneal washing

Tissue fragment collection is faster and more accurate

Inflated bag provides good working space

Inflated bag prevents the inadvertent injury to internal structures

TISSUE MORCELLATION BAG

MorSafe[®] is an innovative single-use disposable device that prevents dissemination of tissue in the peritoneal cavity, allowing for safe morcellation during gynecological procedures such as laparoscopic myomectomy or laparoscopic hysterectomy.

Used in conjunction with the Versator[®] Tissue Morcellator, the system contains and removes the shredded benign tissue mass. It also reduced excess CO₂ from entering the patient, potentially reducing CO₂ side effects.

Features of the Morsafe[®] Bag

Ergonomic design conforming to abdominal anatomy

Distinctive markings for proper placement of the bag

Tissue fragment collection is faster and more accurate

Mouth opening with nitinol wire making insertion into the bag easier and faster

Separate Morcellation & Optical Port

World's 1st Product Specifically Designed for Safe Morcellation!

SAFE TISSUE MORCELLATION SYSTEM

The safe tissue morcellation system comprises of VDU, Handpiece, Rotor and Tissue Morcellation Bag.

Product Specification

HANDPIECE (STERILE DISPOSABLE)	
Cutting Speed	200 - 1600 RPM
Cutting Diameter	15 mm
Cutting Modes	CUT, CUT PLUS & OFF
Weight *	180 Grams
Core Guard Positions	Top, Right & Left
Working Length	160 mm
Usage Status	Sterile, Single use Disposable

TISSUE MORCELLATION BAG (STERILE DISPOSABLE)	
Number of Ports	Two
Sizes	Available in 3 sizes: Small: 1600 ml Medium: 2100 ml Large: 2600 ml

ROTOR (AUTOCLAVABLE)	
Rotor Length	2000 mm
Weight*	460 Grams
Usage Status	Autoclavable: 10 cycles

VERSATOR DRIVE UNIT- VDU (CAPITAL EQUIPMENT)	
Power Rating	100-240VAC, 350W. 50-60Hz
Dimensions*	345 x 215 x 110 mm
Weight *	4.5 Kgs

Note* : The values are approximate. Please refer IFU for exact figure
